TERMS OF BUSINESS.

My Terms are **CASH WITH ORDER,** or against Invoice, and these terms will be strictly adhered to. Buyers must pardon me for being so rigid, but the prices are calculated for Cash, without any risk of loss, and doing business for ready money at the lowest possible price, I cannot make exceptions by altering or concessions—deviations being unfair to other buyers, and I try to act equitably towards all.

Remittances may be made by Post Office Orders, Postal Orders, Registered Letters, Cheques, or Stamps. Cheques, etc, for safety, should be crossed to my Bankers, Lloyds, Limited, Dover.

Any Article that does not give entire satisfaction will be willingly exchanged at any time.

All Guns are carefully packed. Carriage is paid by me (unless otherwise specified) and all Goods except Ammunition are sent by Parcels Post if possible, if not, per Passenger Train to nearest Station,

Foreign Orders must be accompanied by remittance, or an order upon an English Bank or Mercantile Firm for payment against Bills of Lading. Guns for Calcutta, or any African or Australian Port should be enclosed in a zinc-lined case, for which the charge is for One Gun 4s., and every Additional Gun 1s.

On all Orders for Guns built to order, a deposit of not less than 20 per cent. (4s. in the pound) will be required.

Full market value allowed for Guns taken in part exchange for new All arms sent to us for repairs or exchange should bear the sender's name and address.

Repairs or Goods for Exchange in all cases must be sent Carriage Paid.

I guarantee all my Guns and Rifles to bear the Legal Proof Marks as instituted by the Authorities, therefore I do not accept any further responsibility. The Illustrations herein shown are intended as a general guide, and are not considered binding as to details

All Barrels described in this List as Damascus, Curly Demascus, or Fine Curly Damascus, are machine forged, made on the Improved Economic Compound Coiling Process. All Twist Barrels are of the Best Skelp, Machine Forged. Any arm willingly exchanged if not approved of.

My Guns are Known throughout the World. See that every Gun bears my Name.

I hold one of the Largest and most Complete Stock of Sporting Guns and Rifles. If you do not see what you require in this List, please write, particulars shall be sent fully and at length.

Lowest Quotation for High-Class Sporting Goods of every description. Lady's and Gentlemen's Cycles and Accessories per return of post.

All Orders, Letters, and Correspondence to be addressed to **W. J. GEORGE, Gunmaker, Dover, Kent.**

All Parcels sent to me, Exchanges, or Guns, should bear sender's Name and Address, and should be sent Carriage Paid (otherwise they will not be accepted), and instructions sent by same post.

Being the Dover Representative for Messrs. HUMBER & Co's. Celebrated CYCLES, &c., I shall be pleased to quote Lowest Cash Prices on application. I also manufacture the "Dover" Cycle.

REPAIRS, CONVERSIONS, &c.

Re-stocking Guns, from 16/6; re-blueing and re-hardening, 4/- to 12/-; re-browning barrels, twist or steel, 4/6; Damascus, 5/6 to 8/6; top-lever spring, 3/6; repairing, overhauling, cleaning locks, polishing, and re-browning barrels, and making as new, 20/-; new hammers, 2/6 to 4/6; new striker and spring, 2/-; new main spring, 2/6; new fore-end, spring, or bolt, 12/6; choke boring old barrels, 3/- to 6/- per barrel; lengthening stocks, 5/-; taking dents or bruises out of barrels, 2/6; tightening up shakey actions, from 7/6; chambering for perfect cases, 4/-; converting pin to central fire, 25/-; fitting new barrels, fine twist, from 35/-, steel, from 50/-; curly Damascus, from 50/-. I have a Special Department for Repairs, but owing to the peculiar nature of most repairs, it is impossible to adhere to a set of standard prices, but I shall in all eases, where practicable, keep to the above prices. **The above Prices include Return Carriage.**

Illustrations are of Standard Patterns, and made as follows:—bend of stocks, 2-in. to 2½-in; length of stocks, 14-in. to 14¼-in.; length of barrels for 12, 16, and 20 guage, 30-in.; 10 guage, 32-in.; and 8 guage, 34-in. to 36in. Locks with hammers on them are all **rebounding.**

Customers requiring Special Measurements must state the same on their **Orders,** also if **straight,** half-pistol, or full-capped hand be required (unless the same is shown in illustration).

Any Gun, &c., not enumerated in this List will be specially quoted for on receipt of specification.

ALL GUNS showing Pistol Stock, Circular Hammers, or Solid Strikers may be had with STRAIGHT STOCK, Round-body Hammers, or Nipples or Plungers at same prices.

INTRODUCTION.

AFTER YEARS OF SUCCESS.

Read what the "Dover Standard" says:—

"W. J. GEORGE Cycle and Gun Manufacturer, Snargate Street.—Now that the Shooting Season is on call and select your Gun. He stocks all the best makes, besides ammunition of all kinds. Cycles by all the best makers can be obtained here, besides Lamps, Bells, Spanners, and all other Accessories. Repairs are executed on the premises, and riding taught by experienced instructors. Mr. W. J. GEORGE, the Champion of Kent, is a mine of information about Guns, Cycles, and Accessories."—*Extract from "Dover Standard," December 19th*, 1896.

DEAR SIR,—In issuing this Annual Catalogue, I wish to thank Clients once more, for the many warm and encouraging expressions of approval, with practical hints and suggestions, many of which have proved of value to me. During the past season I have had an enormous increase of business, (and this I take it, is the best possible indication that my business is conducted on sound business principles, for the public are sure to support those who provide the best value for the least outlay.) My policy, impressed on my employés, being to put ourselves in the buyer's place, do for him as we would be done by, and never misrepresent or overcharge. Unfortunately no system can prevent errors owing to the neglect of those who administer it, but when an error occurs please believe it accidental and not intentional; and I shall esteem it a favour, in case of the slightest neglect on the part of an employé, if you will write a private letter to me, and I will stop its recurrence, as my desire is that all should receive that attention and civility which will make it agreeable as well as profitable to send to my establishment in preference to others.

The substantial development of business in all departments is such that with the enlarged workshops etc., at my disposal, I now hope to be able to execute all orders from stocked goods immediately.

For the coming season I have not found it necessary to introduce many changes, my aim is to turn out Guns more with a view to utility, strength, sound construction, and durability, than to elaborate finish and outside show, and it is these solid qualities together with their extraordinary long distance killing power, which has brought my Guns to the front throughout the country, Most careful attention is paid to the construction and shooting of every Gun, and I would strongly advise all good shots, or those who would wish to become good shots, to have their Guns built especially to their requirements, as the fit of a Gun is of the utmost importance. For this purpose you will find instructions in Catalogue how to give exact measurements of Stock, etc., required. Many a would-be sportsman has after sundry trials cast his gun aside and given himself up for a complete failure as a shot, under the belief that his eyesight was at fault, whereas the fault was in the fit of the Gun. Some of my customers ask how it is my prices are so much below the prices of the ordinary Gun Makers? The reasons why my prices are so much below those of other Gun Makers are several, viz.:—my terms are *Cash only*, I therefore make no bad debts, and employ no travellers, I do not spend hundreds of pounds yearly in advertising, although I do not under-estimate the advertiser's pen, but the value of an advertisement depends on the goods behind it—and I would here respectfully warn buyers not to be led astray by glowing and expensive advertisements. My Guns are far in advance of any other placed upon the market at the price, on the score of sound construction, durability, and far killing powers. I consider a Gun is an article that cannot be made too good. I am sensible of the fact that there are some Makers or Dealers advertising Guns at lower prices than me, but I can safely go to this extent, and say you cannot buy a Gun of the same quality, same finish, same improvements, at the same price as I sell mine. To those requiring such cheap articles, I would call their attention to the page in this Catalogue, where they will find mention made of (I don't say cheap, but) common made shoddy, manufactured by certain firms in Birmingham and Belgium, whose only object is to throw the Guns together at the lowest possible cost. It is however gratifying to observe that Sportsmen are beginning to appreciate the difference between a jerry-built Gun and a Gun built for strength, durability, and far-killing,—the position to which my Guns have attained,

My Customers may rest fully assured that no effort will be wanting on my part to still further develope by the closest personal attention, the utmost courtesy, civility, and readiness to serve, and the continual putting in practice of those most popular principals of business which have led to success in the past.

To those who have not given me a trial I would say "Do so," you will not regret it; and to those who have, I again tender my warmest thanks, and feel certain that if I lose their confidence it will be my own fault, and not the fault of Goods supplied to them by me.

I remain, yours faithfully,

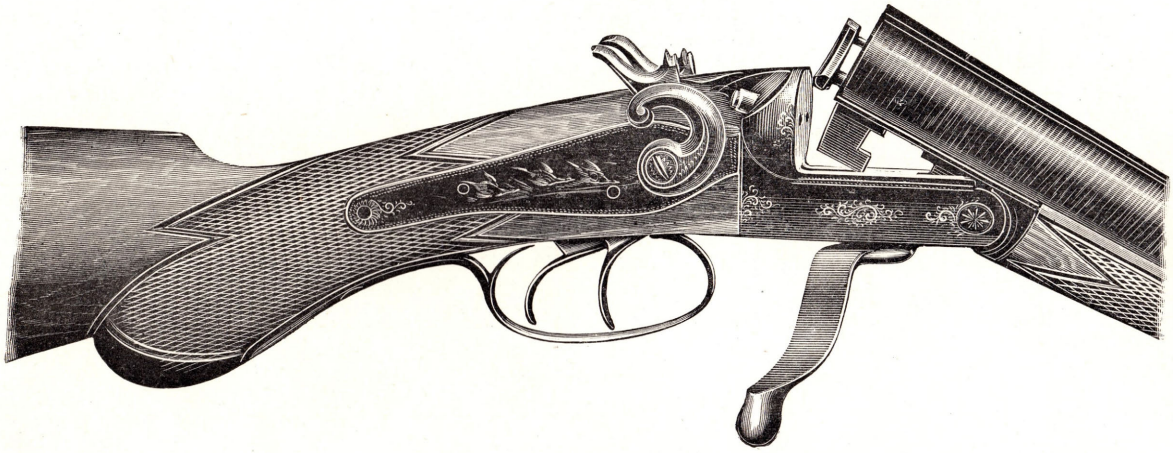
W. J. GEORGE.

N.B.—I guarantee all Guns and Rifles to bear the Legal Proof Marks as instituted by the Authorities. therefore I do not accept any further responsibility. The Illustrations herein shown are intended as a general guide, and are not considered binding as to detail.

THE EXCELSIOR GUN, 50s.

(WITHIN REACH OF ALL, AND GUARANTEED ENGLISH MAKE).

I have noticed there is a great demand for a cheap reliable Double Breech Gun, and have therefore introduced the following Two New Models into this Season's Catalogue; the vital parts, namely locks and body in all wearing parts, have had special attention in fitting; the barrels also have special attention in the boring of same to ensure a good pattern and great penetration, combined with far-killing powers, by my special boring process.



No. 101.

Small Rebounding Hammers below line of sight.

No. 101.—Back Action Locks, Under Lever with Double Grip, English Twist Barrels, Recess Choke, Spring Fore End Fastener, Horn Heel Plate, Pistol Grip Stock.

Under Lever Action if preferred, with Doll's Head Rib Extension, £1 less in either above Models.

The following are selected from a number of unsolicited Testimonials received:—

MINERAL WATER MANUFACTORY,
THE PIER, DOVER,
February, 1900.

Mr. W. J. GEORGE,
Dear Sir,

The Gun (Special Pigeon) that I bought from you in February, 1898, I must tell you has given entire satisfaction. I have won over £120 in prizes with same at Pigeon Shooting, and all off from 28 to 31 yards rise, which alone speak for its far killing powers and good shooting, and I cannot wish for a better gun.

Yours faithfully,
P. WRAITH.

GUILDHALL VAULTS,
GUILDHALL STREET, FOLKESTONE,
October 15th, 1899.

Mr. GEORGE,
Dear Sir,

Enclosed please find cheque for Hammerless Gun; I am well satisfied.

Yours truly,
J. TUNBRIDGE.

BEACONSFIELD ROAD, DOVER,
January, 1900.

Mr. GEORGE,
Sir,

The Gun I bought some time ago at your establishment has turned out a marvellous killer. I have made some most extraordinary long shots, several times I have killed hares which my friends would not shoot at as they thought them too far off.

Yours, etc.,
J. PARSONS, Builder.

THE BURLINGTON,
CASTLE STREET, DOVER,
January, 1900.

Mr. W. J. GEORGE,
Dear Sir,

The Special Pigeon Gun I purchased from you some time since has given every satisfaction. I have won and shared numerous sweep stakes, and also at Ashford a few weeks since won a pony and trap, value £35, from 26 yards rise, best blue rocks, with 11 consecutive kills from a field of 20 competitors.

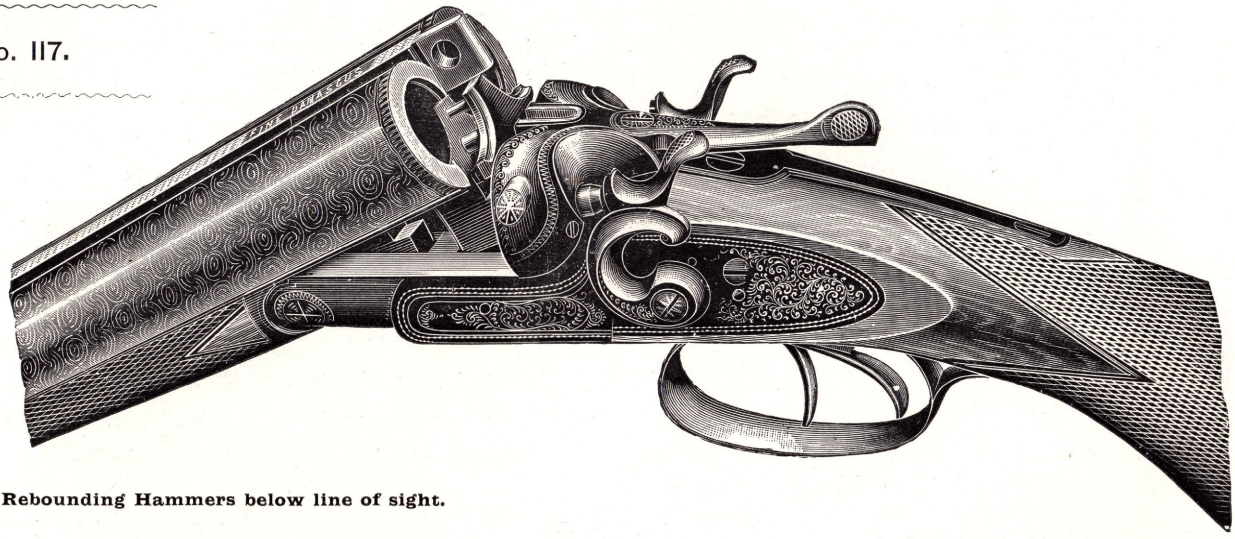
Yours truly,
W. SPRATT.

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

W. J. GEORGE, GUNSMITH, DOVER.

ECLIPSE WILD FOWL AND PUNT GUNS.

No. 117.



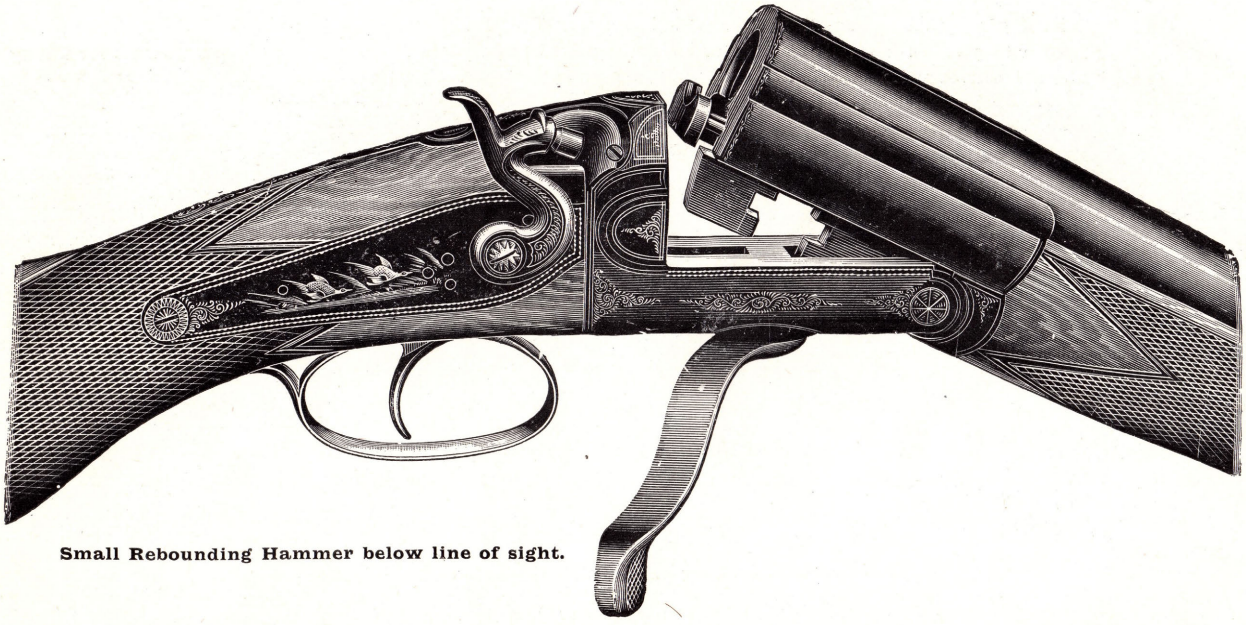
Small Rebounding Hammers below line of sight.

As I make a Speciality of Far Killing Guns, I defy Competitors to equal the Guns described below, either in Far Killing Powers or Value for Money.

No. 116.—English Twist Barrels, Bar, or Back Action Locks, Walnut Stock, Pistol or Straight Hand, Eccentric under Lever Action, made of Stirling Steel, which with Steel Joint Pin effectually prevents the barrels from working loose, Bored for 3in. to 3¼in. Cartridge, 8 Bore 34in. and 36in. barrels, **£6 : 6 : 0.**, 10 Bore 32in. barrels, **£4 : 15 : 0.**

No. 117.—Ditto, Damascus Barrels, 8 Bore **£8 : 0 : 0.**, 10 Bore, **£6 : 0 : 0.**

No. 118.—Ditto, but with Top Lever, and Greener's Treble Cross Bolt, 8 Bore, **£9 : 0 : 0.**, 10 Bore, **£6 : 10 : 0.**



Small Rebounding Hammer below line of sight.

Single Barrel Guns at £1 less than Double, Longer Barrels, to order at **3/-** to **4/6** per inch.

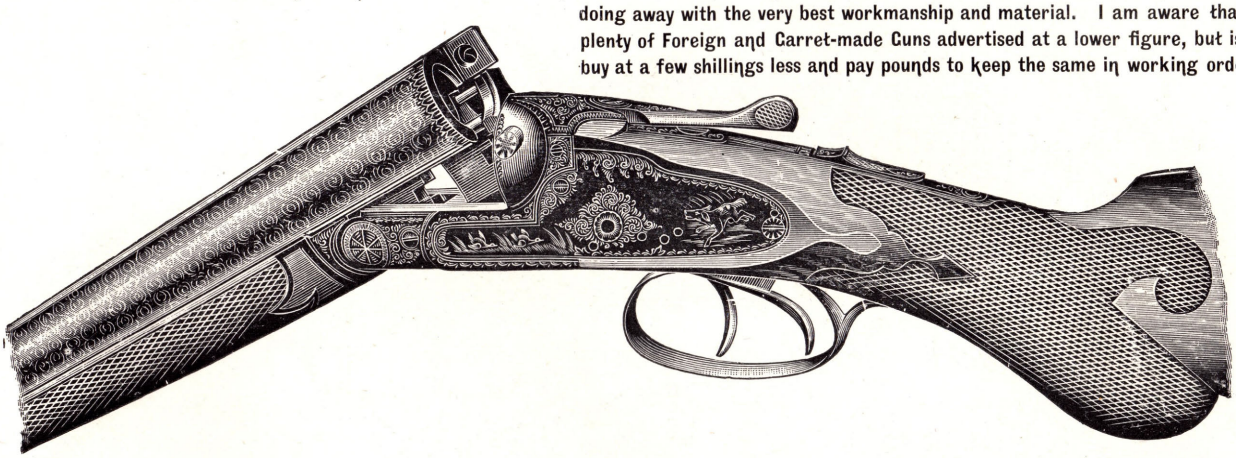
I take the liberty of informing Purchasers of the above Guns, that these are all built to Customer's orders. I do not thrust something on you regardless of whether it suits or not, but wish to please my Customers by selling them what will suit them.

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

W. J. GEORGE, GUNSMITH, DOVER.

THE ECLIPSE HAMMERLESS GUNS.

These Guns I confidently recommend to those who require a Gun to use, and not to look at, the price has been kept as low as possible, without doing away with the very best workmanship and material. I am aware that there are plenty of Foreign and Carret-made Guns advertised at a lower figure, but is it policy to buy at a few shillings less and pay pounds to keep the same in working order?



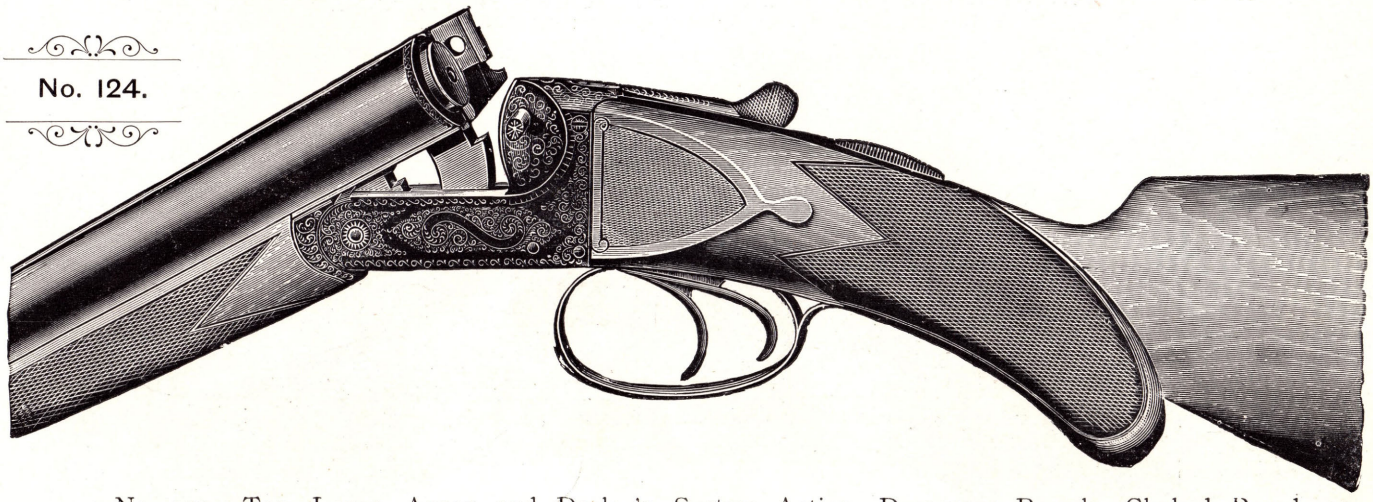
No. 121.

No. 119.—Top Lever, Side Lock, Hammerless, Double Bolt Action, with Stirling Steel Extended Doll's Head Rib, Very Fine Twist Barrels, Choke Bore, Automatic Safety Bolt, Pistol Grip, Selected Walnut Stock, **£7 : 7 : 0.**

No. 120.—Ditto, Damascus Barrels, **£8 : 8 : 0.**

No. 121.—Ditto, but with Greener's Treble Cross Bolt, Superior Finish, and Locks Nicely Engraved, **£9 : 9 : 0.**

No. 124.



No. 122.—Top Lever, Anson and Deeley's System Action, Damascus Barrels, Choked Bored, or order, Greener's Treble Cross Bolt, Selected Walnut Stock, Pistol Hand, and Fitted with my Automatic Safety Bolt, Plain Finish, **£10 : 10 : 0.**

No. 123.—Ditto, Fine Damascus, or Steel Barrels, Shooting Carefully Regulated, **£12 : 12 : 0.**

No. 124.—Ditto, Ditto, but Extra Finish, and can be had as a Trap Gun, if required, to fire very heavy charge, **£15 : 15 : 0.**

ECLIPSE EJECTOR GUNS.

To meet the wishes of numerous Customers, I am prepared to supply either No. 122, 123, 124, Hammerless, Fitted with Patent Automatic Ejector, which ejects exploded Case only, at the extra charge of **£5 : 5 : 0.**

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

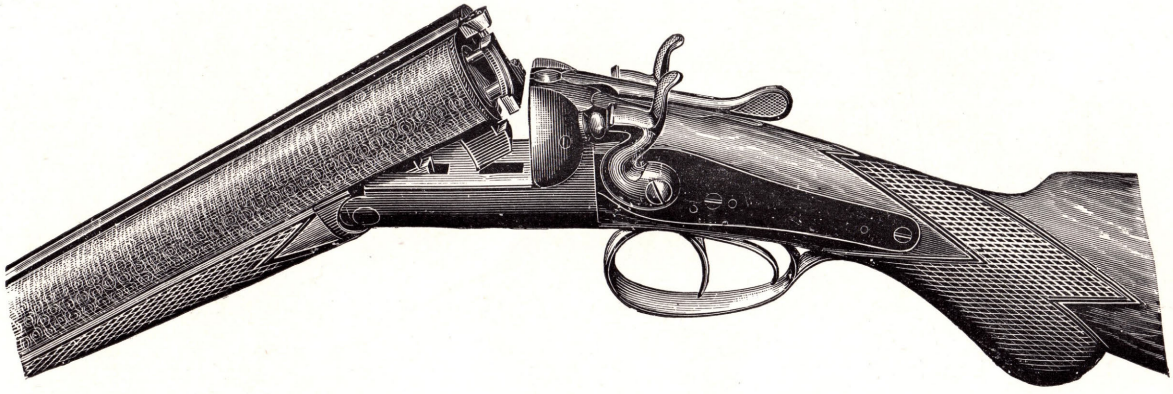
W. J. GEORGE, GUNSMITH, DOVER.

CONTINENTAL MADE GUNS.

At the request of a few of my Customers I am willing to supply the following Guns, 12 Bore, they have been tested, and the Proof Marks stand good in this country, but no further guarantee can be given.

No. 125.

No. 125.—Top Lever Action, Twist Pattern Barrels, Re-Bounding Locks, Back Action, **£1 : 17 : 6.**



No. 126.

No. 126.—Specification as per No. 1, but Damascus Pattern Barrels, and Extended Doll's Head Rib. **£2 : 2 : 6.**

No. 127.—Single Barrels as per No. 1, **£1 : 16 : 0.**

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

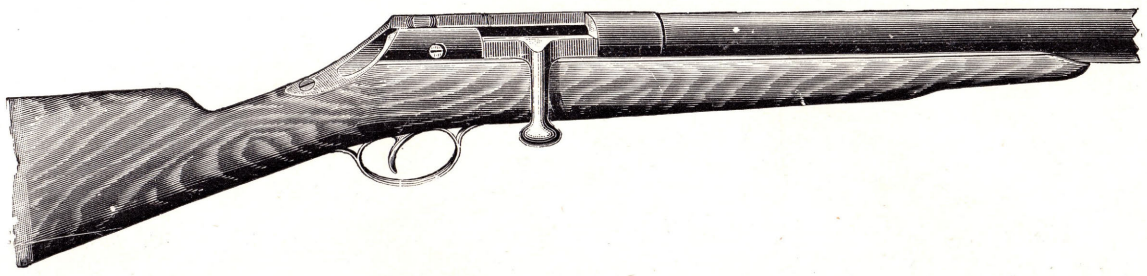
W. J. GEORGE, GUNSMITH, DOVER.

HAMMERLESS SHOT GUNS.

12 BORE ONLY.

CONVERTED FROM GOVERNMENT RIFLES.

No. 129.



No. 128.—Single Barrel, Steel, Military Browned, Bright Fittings, Walnut Stock, Plain, **17/6.**

No. 129.—Ditto, Better Quality, Checkered, **21/-**

No. 130.—Ditto, Well Finished, Half Pistol Hand, Checkered, **25/-**

The Converted Rifles are all carefully selected, and if at all faulty are thrown out, all the Actions are Tested, and therefore there is not any danger of them going off unawares, as there is with some of this class of Gun which is advertised by Dealers at Cutting Prices, but I do not wish to sell goods I cannot recommend.

Long Range Martini Shot Gun.

12 BORE ONLY.

NOT A CONVERTED RIFLE.

No. 131.—Nickel Plated Action, Half Pistol Hand, Checkered Stock, and Fitted with Automatic Safety Bolt, Guaranteed to make a Splendid Pattern, **42/-**

I supply a Special Cartridge for the above Guns, either Black Powder or Nitro, at 8/- per 100, in 500 Lots, Carriage Paid on Rail to nearest Station.

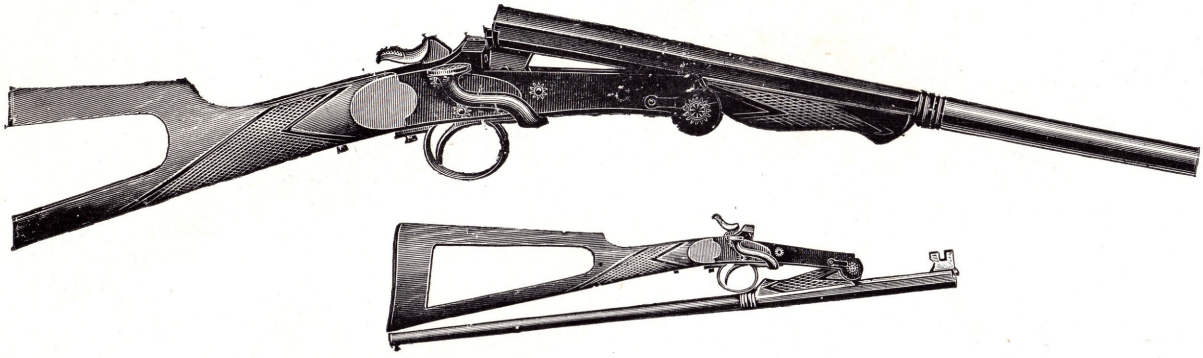
I can recommend all the above Guns as being made to stand hard wear, and as a Cheap Far Killing Breech Loader, they cannot be surpassed.

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

W. J. GEORGE, GUNSMITH, DOVER.

THE COLLECTOR'S GUN.

For Ladies, Youths, and Naturalists.



No. 134.

No. 132.—Single Barrel, Blued Steel, Side Lever, Well Made, 410 Bore, **£1 : 18 : 0,** 28 Bore, **£2 : 5 : 0.**

No. 133.—Ditto, Better Finished, Pistol Hand Stock, 410 Bore, **£2 : 7 : 6,** 28 Bore, **£2 : 15 : 0.**

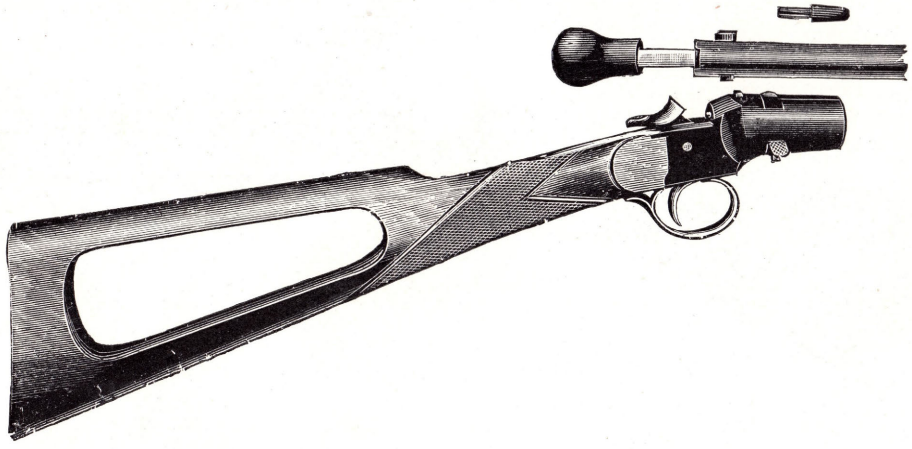
No. 134.—Single Barrel, Folding, 410 Bore, Gun Side Lever, Fixed Wood Fore End, Blue Steel Barrel, Case Hardened Action, **£2 : 10 : 0.**

No. 135.—Ditto, Double Barrel, **£4 : 0 : 0.**

Directions for No. 134:—For ordinary use this Gun opens and shuts like a Side Lever Gun. To fold it up, press in the Button on side of action, and bend barrel forward till in position with barrel touching stock, where it locks itself. To unfold, press the Button again and close the Gun in the usual manner.

THE WANDERER'S GUN.

No. 136.



No. 136.—This Gun is specially designed for those who are fond of Shooting, but do not like the idea of always carrying their Gun under their arm, the Barrel therefore is made to fit on the Bayonet principle, the Stock with Lock attached can then be carried in the Coat Pocket, while the Barrel has a handle fitted to the Breech, and a furl in the end for the purpose of using same as a Walking Stick, Selected Walnut Stock, Checkered, Barrel and Fittings Blued Steel, **£2 : 2 : 0.** Can be had 410, 28, 20 Bore, with Skeleton Stock, as per Block, or 12 Bore, not Skeleton Stock.

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

W. J. GEORGE, GUNSMITH, DOVER.

Good close shooting can only be obtained by using cartridges loaded rationally, and there must be good wadding between the powder and the shot. The secret of good shooting is in the employment of a first-class felt wad over the powder; The texture must be close and firm, but the relative hardness or softness of the wad is of less moment. It should be of the same diameter as the internal diameter of the cartridge case in which it is to be used, and it should be well pressed.

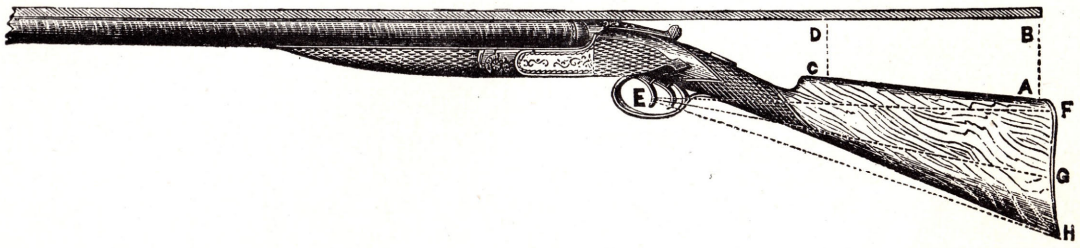
Carriage Paid only on 500 lots of Loaded Cartridges, and 1000 lots of Cartridge Cases.

Any Goods not approved of I shall be pleased to exchange if returned in good order three days from receipt of same.

W. J. GEORGE, GUNSMITH, DOVER.

Instructions for Measuring

Bend and Length of a Stock for Gun or Rifle, when special dimensions are required.



Fasten a straight piece of wood, measuring the full length of the Gun, to the rib of the barrel, so as to extend beyond the stock, and having placed the right hand lock to half cock, take dimensions as follows, viz.:—

Bend, from	**A**	*to*	**B**	*Inches.*
,, ,,	**C**	,,	**D**	,,
Length ,,	**E**	,,	**F**	,,
,, ,,	**E**	,,	**G**	,,
,, ,,	**E**	,,	**H**	,,

PLEASE DO NOT CUT OUT THIS PAGE WHEN ORDERING, I ONLY REQUIRE THE DIMENSIONS IN YOUR LETTER.

HOW TO TAKE CARE OF YOUR GUN.

To clean a Gun after a day's shooting. If it be wet, wipe it dry at once, but if the time is too short to do it properly you had better put some oil on the gun, you can leave the cleaning until the next morning, when you can give it your thorough attention. The barrels may be cleaned with the cleaning rod, used with tow and turpentine. To remove the fouling, place the muzzle upon the floor and press down to within an inch of the same and then withdraw it up the chamber, repeating this two or three times and then push it right through. Use the rod with plenty of flannel, and finish with the mop soaked in neatsfoot or Rangoon oil. Always wipe the barrels dry and clean before oiling, and do not use the oiling mop for a foul barrel.

The cocking lifters of hammerless guns, the triggers and holding-down and top bolts, if inclined to clog, may be oiled with a feather dipped in petroleum. To lubricate them use the best neatsfoot. Should the barrels at any time become rusty, either inside or out, scald them well with a kettle of boiling water, afterwards wiping them perfectly dry and oiling them.

Never send a good gun to anyone but an experienced man, as jobbers often place their name on it and tell you they have improved its shooting; and if at any time you want it "choke bored," or converted into a cylinder, send it to no one but the maker or a first-class gunsmith.

Should a gun need repairing always send the whole of it, as to do the work properly, it is necessary that the workman should have it in its entirety, and, if possible, have your gun overhauled by its maker or a good gunsmith every year.

PLEASE NOTE.—I Manufacture the "DOVER" CYCLES,

AND AM ALSO DISTRICT AGENT FOR

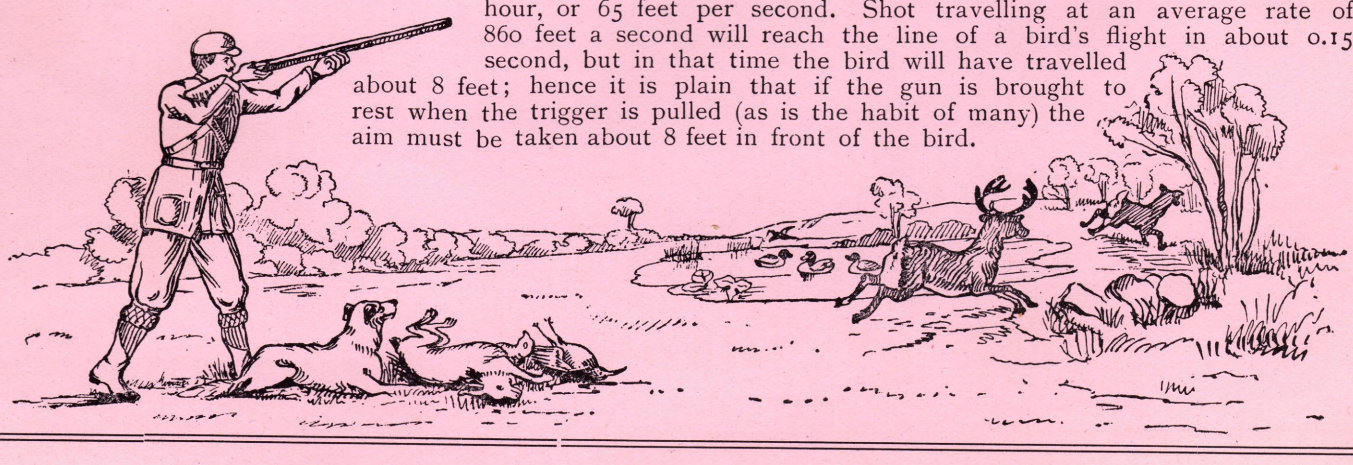
HUMBERS, CENTUARS, SINGERS, &c.,

ALSO ALL CYCLE ACCESSORIES.

Prices quoted on application, and Machines sent, Carriage Paid, to nearest Railway Station.

HINTS ON SHOOTING.

Let the learner who desires to become a fair shot first get a suitable gun, and go out at every opportunity, bringing his gun up quickly and firmly to the shoulder to any living and moving object he may come across, taking aim at and following the same but not firing. Let him continue to do this for ten or fifteen minutes, firing a shot now and then when he has the object well covered, but keep the gun on the mark when pulling. Practice of this kind for a week or so will ensure his becoming a shot in a very short time. The sportsman must have confidence and keep cool and watch where his shot strikes. and let him be certain he can kill with the first barrel before using the second.

To him who wishes to improve his shooting I should recommend his going out by himself, taking one dog alone with him to hunt up the birds; and if he has no one to mark his misses, and carries his own game, he will soon become a steady shot, unless his sight is defective, and thus be able to hold his own in a crowd where formerly he felt very nervous.


Taking aim at a bird flying across or at right angles to the sportsman, take aim at the head and keep the gun on the move during the whole time and until after you have pulled the trigger. A knowledge of the velosity of shot enables one to see what allowance is necessary to be made for game moving at a great speed. Take, for instance, a bird coming with the wind and across the line of fire at right angles at a distance of 40 yards. The speed at which the bird is travelling is about 42 miles an hour, or 65 feet per second. Shot travelling at an average rate of 860 feet a second will reach the line of a bird's flight in about 0.15 second, but in that time the bird will have travelled about 8 feet; hence it is plain that if the gun is brought to rest when the trigger is pulled (as is the habit of many) the aim must be taken about 8 feet in front of the bird.
